Meet the Career Planner:

Sector Spotlight: Information Technology (IT)

The IT industry is a growing sector in Wisconsin with high demand and not enough job seekers available to fill those positions. In an article published by WisBusiness.com, IT employment has expanded by over 44,000 new workers in more than 12.5% of tech related jobs in the last year. A continued rise in need for workers in the field is expected. If interested in a career in IT, [E3 Works](http://E3Works.com) can help you achieve your career goal with paid training in IT.
